# PRIVATE LABEL PROGRAM

Our Quality, in Your Brand

**WE CAN PUT YOUR COMPANY NAME, LABEL AND BRAND ON THESE**

# About the Factory

For the last 47 years, factory has been recognized as a specialized designer and manufacturer of hand tools. At our factory located in Istanbul, a passionate team of 100 people produce high-end hand tools and storage systems for professionals in diverse industries. Our production programme includes:

- Pliers & Cutters - for electricians, mechanics and builders
- Aviation Snips
- Screwdrivers – regular and insulated (VDE approved)
- Voltage testers
- Storage Systems

The production lines are heavily automated and involve state of the art technology (multi-axis machining centers, robotic grinding, double shot injection molding etc.). This strong infrastructure coupled by the hard work and expertise of our team produces some of the highest quality/price ratio ranges on the market.

We are quite confident that any professional user of tools will appreciate the quality of these products.

This is our main drive because the customer is in the center of everything we do; give us a try and see by yourself.

## 3 PRODUCTION AND LOGISTICS LOCATIONS

Manufacturing operates in 3 different locations which are conveniently located for our international visitors.

**FACTORY-1:**  
PRODUCTION, LOGISTICS AND ADMINISTRATION

**FACTORY-2:**  
HOT FORGING

**FZ WAREHOUSE:**  
INTERNATIONAL LOGISTICS

With almost 50 years of experience in the development of production of hand tools and tool trolleys, factory stands for high quality standards and manufacturing excellence. In 2 different production locations, we run a variety of production technologies under one roof. Being an integrated manufacturer, we are able to keep a close eye on all critical processes.

## YOUR PREFERRED PARTNER FOR PRIVATE LABEL MANUFACTURING

AGS-TECH since many years is in the forefront of private label contract manufacturing. We have established a solid customer base in this segment and we are already serving world-class brands.

Nowadays, the marketplace is more competitive than ever and partnering with competent suppliers is essential to survive. Therefore we decided to give a completely new identity to our private label manufacturing division. We have redefined our production processes to offer a larger range of products against lower minimum order quantities. Added the recent investments we have made to our production, we are now more capable than ever to offer first class, flawless service to the private label market. Take advantage of our offer.

DIN ISO

## COMPETITIVE ADVANTAGES

- World-class product quality
- Large product range – possibility to build kits
- Reasonable price point
- Low MOQ requirements
- Unlimited packaging, marking and coloring options
- Logistics advantage – proximity to Europe, short lead times

If you would like to know us better, we warmly welcome you to visit the factory. We are sure you will be convinced with what you will see.

## PLIERS PROGRAM

Quality down to the last detail

Our goal was simple: to manufacture some of the best pliers on the market.

We started from the basics and redesigned the cutting edge geometries, sharpness, leverage ratios, overall dimensions etc.; all to perfection. Then we had our "ideas" forged into accurately dimensioned blanks in Solingen, Germany by a competent partner with more than 100 years of know-how.

During these phases, we have completely renovated our in-house processing lines. Multiaxis machining centers, automated induction lines and robotic grinding units were installed. This is technology at its best coupled by the passion, hard work and expertise of our team.

Stringent quality controls at all critical manufacturing steps further ensure that any pair of pliers leaving our premises could only be "perfect".

We are quite confident that anybody who uses pliers professionally will appreciate the quality of our products. Put us to test and see by yourself!

### Surface Finish Options

Grey Finish

Black Phosphate

Polished

Mat Chrome

Chrome

#### DURABLE

Premium quality German steel from Solingen coupled with the machining and heat treatment know-how of this production plant ensures long years of tool life.

#### SMART

Cleverly engineered designs of all pliers we manufacture, allow for better performance with minimal effort.

#### ERGONOMIC

The well-known brand ergonomics is self-evident in all pliers we manufacture. Hours of fatigue free use is made possible.

#### VERSATILE

From combination pliers to circlip pliers, side cutters to cable cutters, we offer a complete family of pliers - a one stop shop!

## C-Plus SCREWDRIVER PROGRAM

**new**  
design

Our popular C-Plus screwdriver range has undergone a major redesign process. The new handle design offers even better handling ergonomics compared to the previous version. Moreover the new 3K molding technology used in the production of these screwdrivers enable us achieve an even higher molding quality hence better haptics. Available in 4 different variants two of which are new.

**3K**  
TECHNOLOGY

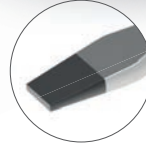

inch  
"

XL handle base to enable increased torque.

Slim (S) handle section for turning with speed.

Precision machined, perfect fit tips

Pad print on top of handle enables selection from toolbox.

### Standard Screwdrivers

inch  
"

The standard version. Offered in a versatile range of tip profiles. High torque, exact fit blades.

### Impact Screwdrivers

The power screwdrivers suitable for impact use. Metal striking cap, hex bolster and fully extending blade.

# PRIVATE LABEL COMPETENCY

## Diamond Tip Screwdrivers

The screwdrivers with tips which bite into the screw. The Micro Diamond particles in the tip secure a strong connection between the tip and the screw.

## VDE 1000V Screwdrivers

The security screwdrivers for safe live working. Manufactured to EN 60900 standard and individually tested to 1000V AC and 1500V DC.

**slimline** Also available with slim shaft blades

## Voltage Testers

Voltage testers to round off the VDE screwdriver offer. Ergonomic and impact proof plastic body.

## T-Handle Drivers

T handle drivers which combine the functionality of a screwdriver and a hex key. Very high torques made possible.

Also available in 1000V design

**Grips**  
Because we have our own plastic injection manufacturing and mould construction workshop we have a high variety of available grips. On page 7 of our private label catalogue you can see a list of all available grips. Grips can be adapted to your individual requirements by the following options.

## EXTENDED RANGE OF 1000V INSULATED TOOLS

Ultimate safety with comfort

Considering the ever-increasing hybrid and electric vehicle sector, we have extended our successful range of 1000V insulated tools. The range now includes mechanical tools such as wrenches, sockets and torque wrenches in an insulated design for safe working. Like all our insulated tools, the new tools are also manufactured to EN 60900 standard and individually tested to 1000V AC and 1500V DC.

## ROLLER CABINETS

The ultimate in tool storage

**GT**MAX

We believe the ultimate in hand tools deserves the ultimate in tool storage. Therefore after endless hours, weeks and months of research and many user interviews we have developed the new GT-MAX roller cabinet series.

This range addresses even the most diverse user needs in the typical cabinet build quality. The cabinets can also be fitted with a selection of foam modules and a range of accessories.

Experience the new dimension in tool storage by yourself.

### SAFE

Three-staged locking system prevents tilting, unintentional opening of drawers and secures the tools.

### VERSATILE

6, 7 or 8 drawers? Standard body or Jumbo body? Your preferred color configuration? All possible in the GT-MAX range.

100%

### ADAPTABLE

Euro perforated side wall and a large range of accessories allow for a totally custom-built cabinet. CFS tool module system for the final touch.

### TOUGH

Torsion resistant profile construction from heavy gauge steel and plastic protection on all corners against impacts.

## 100% CUSTOMIZED MANUFACTURING

Have you got a unique design idea? No problem, we are a competent partner to realize your project. Our design team can cooperate with you to generate 3D models and prototypes. Once approved, the necessary forging dies, fixtures, injection mold toolings, etc. will be developed for the desired model range. Your idea will be in serial production in truly short period.

Take advantage of our offer; please feel free to talk to us for details.

### Embossed Logo

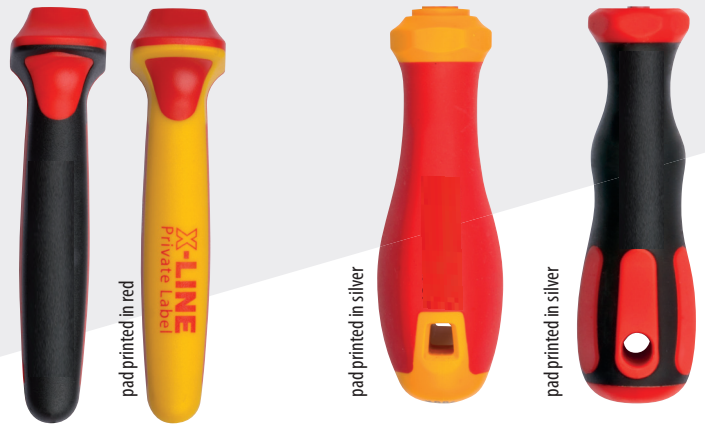

For a very small initial investment, we can develop custom inserts and produce any brand or pattern embossed to the grips. Result: high impact brand image.

### Pad Printed Logo

Your logo can be pad printed on the lateral surfaces of the grips in an appealing way. We stock a selection of pad printing ink colors

#### Pad print ink options

### Laser Marking

Your logo can be laser marked on the metal surface in any desired layout at no additional cost. Laser marking ensures your brand is permanently etched to the pliers. Result: your brand always visible.

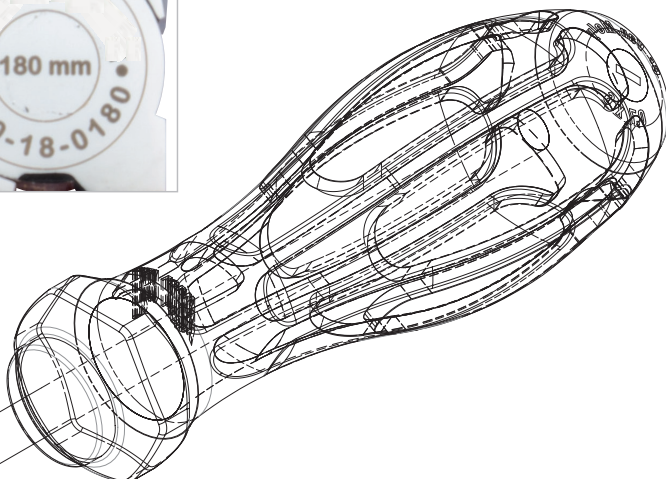

### Grip Colors

Standard stock colors

\* Special color codes also available on demand

### PACKAGING AND KITS

The ultimate in quality deserves the ultimate in packaging. Therefore, we offer a limitless choice of packaging alternatives. Your brand could be on the forefront on the market with innovative packaging solutions from us.

Factory manufactures not only pliers but also screwdriver, testers, workshop tools etc. This gives us the flexibility to offer complete ready for sale. No hassle of repackaging or complex logistics arrangement for our customer.
