Robotic Laser Welding Workstation

High welding efficiency
Single-pass welding for less consumables
Perfect weld without grinding or polishing
Simple operation & versatile applications

Primarily designed for laser welding, the workstation features an integrated design with a small foot print. Equipped with retractable wheels that offers easy maneuverability, the station can be repositioned conveniently at any time according to the site requirements. With a complete set of welding processes, it can be applied to welding of sheet metal, such as stainless steel, carbon steel, and aluminum alloy, in various scenarios including sheet metal fabrication, furniture, kitchenware, lamps, water tanks, billboards, door and window frames, and auto parts.

TCR100

load: 10kg

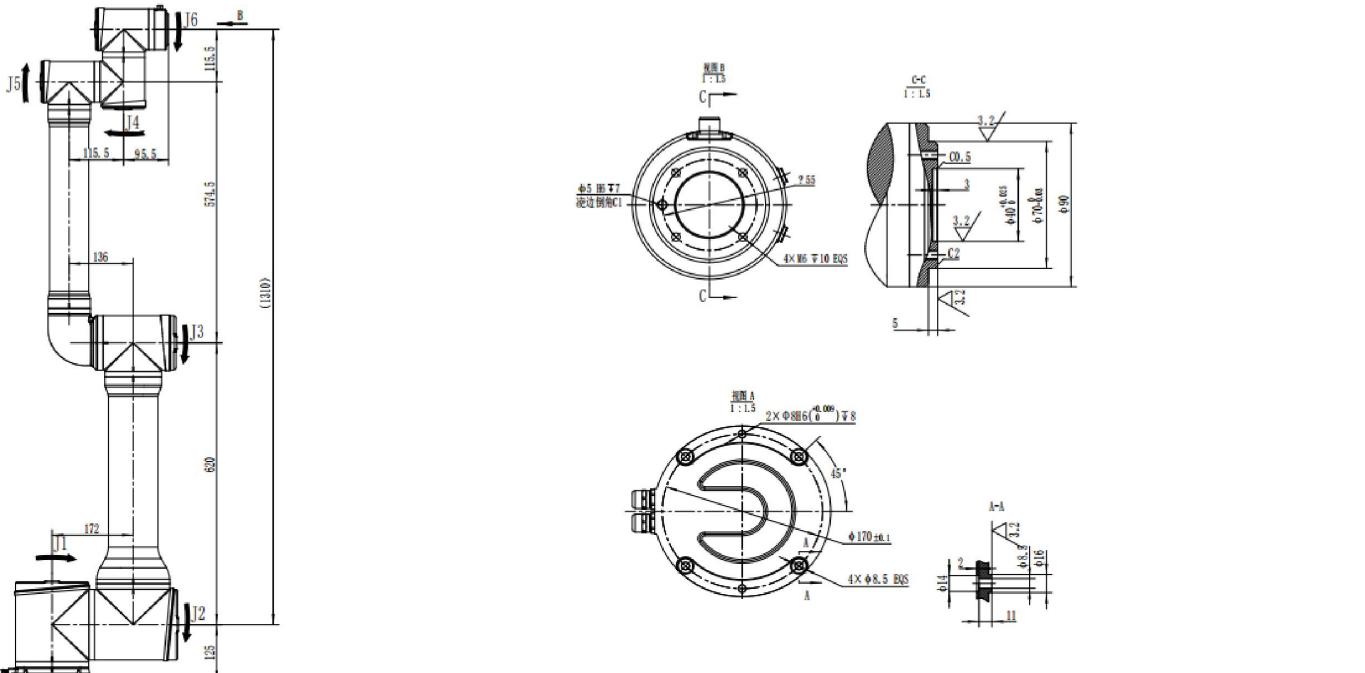

Arm length: 1310mm

Parameters of Collaborative Robot

Payload	10kg
Max Working Radius	1310mm
Body Weight	43kg
Rated Power	3.5kw
J1	120°/s
J2	120°/s
J3	120°/s
Max Speed	J4 180°/s
	J5 180°/s
	J6 180°/s
J1	±175°
J2	±175°
Max Operation Area	J3 -245° ~ +65°
	J4 ±175°
	J5 ±175°
protective specification	J6 ±360°
Position Repeat Accuracy	IP54/IP67
Position Repeat Accuracy	±0.05mm
Working Temperature	0~45°C

Installation Dimensions of Collaborative Robot

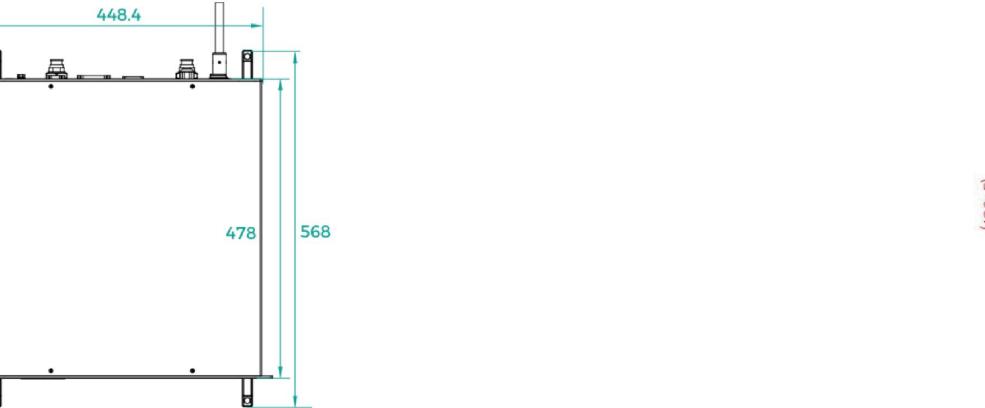

Laser Amplifier

The photoelectric conversion efficiency of fiber laser amplifier is as high as 40%, which is more than 13 times that of solid-state YAG amplifiers (3%). Its power stability is <±1.5%, providing reliability and long service life.

Parameters of 1.5KW Laser Amplifier

Model	EFRC-1500-CN
Optical Properties	
Output power (W)	1500
Working mode	Continuous/pulsed
Polarization state	Random
Power range (%)	10~100
BPPBeam parameter product (mm × mrad)	<1.5
Power stability (%)	<±1.5 (1Hour (s))
Center wavelength (nm)	1080±10
FWHM Spectral width FWHM(nm)	<5
Max modulation frequency (kHz)	20
Indicator red light power (μw)	>200
Output Cable Parameters	
Output mode	QBH
Cable length (m)	10
Output fiber core diameter (μm)	25/50
Fiber optic cable bend radius (mm)	200
Electrical Properties	
Electrical Properties (VAC)	200~240.50/60Hz
Rated power (kW)	5
Control mode	RS232/AD/Ethernet
Other Parameters	
Operating ambient temperature (°C)	10~40
Operating ambient relative humidity (%)	10~85
Cooling method	water-cooling
Set temperature of cooling water (°C)	Ambient temperature ≥30 26
	Cooling water flow ≤30 22
laser amplifier (L/min)	≥15 (laser) , ≥2 (QBH)
Cooling water pressure (Bar)	≥3
Outer diameter of cooling water connector (mm)	12
Overall size(mm)	wide482.6×deep478×high128 (Handle free)
Total weight (kg)	28±2

Dimensions of Laser Amplifier

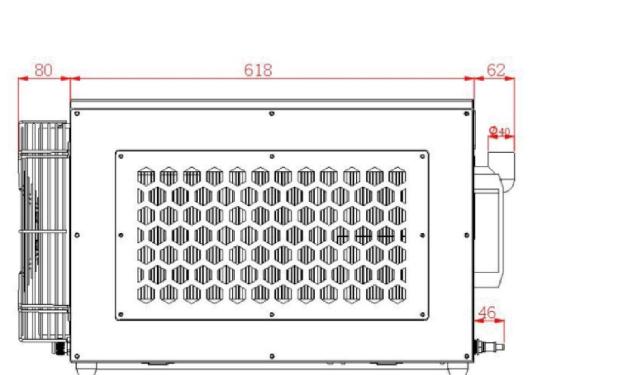

Water Cooler

The water cooling system is composed of an internal optical path cooling system and an external optical path cooling system. The internal one comes with the laser amplifier, while the external one uses the laser water cooling unit to ensure the long-term stable operation of the laser. The refrigeration unit will automatically refrigerate when the water temperature exceeds the specified limit, or stop refrigeration when the water temperature is lower than the specified limit.

Parameters of Water Cooler

Model	SCH-1500	SCH-2000
Voltage & Frequency		
1p 220V/50Hz	1p 220V/60Hz	1p 220V/50Hz
Current	9.5A	9.1A
Machine power	2.1kW	2.0kW
Application environment	0°C<Environment temperature<45°C, Relative humidity<95%	
Tempe. control accuracy		±1° C
Cooling capacity	4.5kW	5.6kW
Electric heating power	400W (Normal temperature)	
Refrigerant	R32	
Rated flow of water pump	2m/h	
Max.pump lift	20.5m	27.5m
Pump power	0.25kW	0.32kW
Tank volume	13L	
Laser nozzle interface	G1/2*Φ12mm Quick connector	
QBH head nozzle interface	G1/2*Φ 6mm Quick connector	
Size and weight of the machine	760*485*430mm 41 kg	760*485*430mm 43kg
Packing size and weight	800*500*595mm (L*W*H) 49kg	800*500*595mm (L*W*H) 51kg
Functional characteristics	Efficiency & environmental protection ; double temperature controls; flow & over temperature alarm : Thermal protection of compressor	
Recommended matching	1.5kW Continuous fiber laser	2.0kW Continuous fiber laser

Dimensions of Water Cooler

Welding Head

The drawer design of protective lens ensures low maintenance and perfect sealing. Full optical and body water cooling improve the stability and service life of the welding head. It can also be equipped with automatic wire feeding device to complete wire-filling welding. Special air knife or coaxial blowing method to effectively protect the lens.

Parameters of Welding Head

Max power	2000W
Optical fiber interface	QBH/RD
Collimating	F100
Focusing	F200 (Standard)F250/F300/F400(assorting)
Clear aperture	D26mm
Collimating Protective Lens	D28X2mm
Focusing Protective Lens	D30x4mm
Protective gas pressure	10, 15, 20, 25bar
Weight	1.95kg
CCD cable length configuration	Cable length 5m (standard)Cable length 8m/10m (optional)
